

CANYONS TOUR: CANGILONES DE GUALACA

This mini canyon is located in the community of Gualaca, a quick 35 minutes ride away from Boquete. The natural pools of Gualaca are a section of the river Esti where the erosion of the river over millennia gradually eroded the bedrock to create this beautiful canyon.

The water in the canyons is clear and popular with people jumping into the river from the rock formations and lounging in the sun.

The tour includes transport and a bilingual guide.

Don't forget to bring:

- Your camera
- Water
- Sunblock
